FREE DROP PROMOTION TERMS & CONDITIONS

Eligibility. Residents of certain areas designated by BARConnects, LLC (“BARC Connects”) from time to time may be eligible to receive construction of a free service drop in conjunction with a new Internet service connection. Typically, the free drop promotion is combined with an installation fee to cover the costs of the in-home installation, but it is not required. Free drop promotions also typically require a fixed-term contract to enable BARC Connects to recoup the construction costs associated with the service drop over the life of the initial contract.

Limitations. The free drop promotion is limited by the following:

The total estimated cost of the drop, including construction, splicing, overhead and other expenses, shall not exceed \$7,000. If the total estimated cost of the service drop exceeds this amount, the consumer shall be subject to BARC Connects’ standard extension policy in effect at that time and shall not be eligible for the free drop promotion.

The consumer must agree to pay for Internet service for the full term of the initial agreement or be subject to the contract break fee.

The free drop promotion may be revoked by BARC Connects at any time for any reason.
